location: Somerville, MA

ABOUT ME │ I'm front-end developer who's enthusiastic about creating code and websites that look good and work like a dream. I am looking to obtain a position that will enable me to keep learning while I put my skills to good use.

EDUCATION

WESLEYAN UNIVERSITY
B.A., College of Letters, 2012
An interdisciplinary, writing-intensive major covering literature, philosophy, history, and language.

SKILLS

JavaScript	**HTML5**	**CSS3**
jQuery	**Git & GitHub**	**AJAX**
Ruby & Rails	AngularJS	Node.js
MySQL	PostgreSQL	MongoDB

EXPERIENCE

WEB DEVELOPER, *Freelance*
August 2015 – Present
Designed and updated websites and web pages according to client's specifications, using various technologies, including WordPress and Cascade, another content management system.

WEB DEVELOPER, *Harvard Medical School*
December 2015 – January 2016 (Contract)
Created HMS Continuing Education course websites with the CMS CVENT, using HTML and CSS to optimize. Updated course template and standardized media file names to speed future course creation.

WEB DEVELOPMENT IMMERSIVE, *General Assembly*
May – July 2015
A twelve-week, full-time course covering web development from the front end to the back end. In addition to several languages, databases, and frameworks, the course covered programming fundamentals, industry best practices, project development and version control, and team collaboration.

PROJECTS

JUDGE THE KITTIES
View: http://judge-the-kitties.herokuapp.com/
GitHub Repo:
https://github.com/toomanyadverbs/judge_kittens_api
Like 'Hot or Not', but for judging your cats! A Ruby on Rails app with a JavaScript front end, utilizing jQuery, Bootstrap, and a PostgreSQL database.

LET'S BUILD A CASTLE
GitHub Repo: https://github.com/toomanyadverbs/project-4-easy-html-tutorial
An entry-level HTML and CSS tutorial aimed at getting kids to explore. An Angular app using Ace, an embeddable code editor framework, Bootstrap, and MongoDB with Mongoose.

NOZAMA BOOKS
View: http://arcane-escarpment-7767.herokuapp.com/
GitHub Repo:
https://github.com/Hogue/project_three_ecommerce_prompt
A team project: an e-commerce website using Node.js, MongoDB, and the Stripe API (to process credit card payments). Also implemented user authentication and the Materialize.css framework.

TIC-TAC-TOE
View: https://toomanyadverbs-ttt.firebaseapp.com/
GitHub Repo:
https://github.com/toomanyadverbs/tictactoeproject
My first project: a front-end app to allow you to play tic-tac-toe in the browser. Made with JavaScript game logic, HTML, and CSS.
